

FREE DENTAL CONSULTATION GUIDELINES

The free dental consultation gives Dr. Roland the opportunity to discuss possible ways to improve the patient's smile and what dental procedures are needed to affect these changes.

During the dental consultation, the patient **will receive** the following:

- 1) An introduction to Dr. Roland and his staff,
- 2) Dental treatment options available to improve the patient's smile and oral health, and
- 3) General costs associated with standard treatment options. For example, the cost of an FMX; the cost of a prophy; the cost of an oral evaluation and x-ray; etc.

The following **restrictions** apply:

- 1) A patient who does not keep the first free consultation appointment is NOT entitled to a second free consultation appointment regardless of reason for cancelation.
- 2) Specific treatment plan fees cannot be quoted without necessary diagnostic evaluation.
